

Anonymous Statement of Group Effort EG1204 Urban Meteorology Poster

Each assigned member of your group should **actively participate** during **both** the meteorology field data collection exercise in All Saints Park **and** the creation of the final group poster.

Sometimes it is unfortunate that people do not engage and try to obtain marks earned by other (active) group members.

In order that people who **DO** engage and work towards a good mark are not penalised for fellow group members who do not 'pull their weight' each person will have the opportunity to anonymously disclose an estimate of effort each group member has input.

Normally it would be expected that a group of **5** people would each provide **1/5 (20%)** of the overall group effort. Where some people do less work than others they should deserve a lesser score. Individual marks for the assignment will be scaled according to the amount of effort that person puts in.

For example, in a group of 5 people where 2 group members are lazy and do nothing, each of the remaining 3 people will achieve an equal effort score of 33% whilst the 2 lazy members get a score of 0%.

YOUR GROUP NUMBER: _____ (between 1 and 18)

NAME (give name of each group member)	% Effort Input To Assignment (must add up to 100%)

Please note that it is **YOUR** responsibility as a group to make email contact with each other after the field data collection day to work on your poster and share the costs etc. Non-attendance on the field day **OR** the poster presentation will lead to that person's mark being capped at 40% regardless of how much effort they put in afterwards. Non-attendance at both the field day and the poster presentation will lead to a mark of ZERO.

People who are disclosed as having not contributed a fair share of effort will be subject to detailed questioning by staff during the poster display
